# Why is it in spanish

Why is it like that in spanish. How goes it in spanish. Amazon why is it in spanish. Why is it funny in spanish. Why it is so in spanish.

Image: Image source / Photodisc / Getty Images As with any language, Spanish speakers come in a wide range of fluidity. Even native speakers, people who have learned Spanish as a first language, vary widely in their knowledge of the language. Many speakers learned Spanish at home but never learned the official grammar and spelling. Others may have learned Spanish at school and have acquired all formal Spanish, but, when it comes to surviving an informal conversation, they may also be speaking Chinese. Where are you on your language trip? Do you travel with a dictionary or search words on your phone for every other sentence? Do you dream in Spanish? Some say that once you start dreaming in a foreign language, you have reached a higher level of fluency à you are beginning to process the information in the new language unconsciously. Learning a new language gives us more than the ability to communicate in a new language. It opens a portal into the culture that gave birth to language in the first place. Because language and culture are so intertwined, gaining fluency allows you to enter a culture in ways that are blocked if you don't speak the language. Are you fluent, competent or just dangerous with a dictionary? Translate these questions into answers, and we'll tell you what other people hear when you speak Spanish! Heat a large non-stick pan and add some pieces of chicken, skin side down. When the skin has become deep golden, mix to brown on all sides. Remove to a plate and remaining brown pieces. Add the onion, pepper and chorizo to the pan and fry over medium heat for 5-10min until the onion is golden and soft and the chorizo brown on the edges. Mix in garlic and paprika and cook for 1min. Return the potted chicken with tomatoes, rice (the key is to use Spanish paella rice, but if you can't find it, use a risotto, which has a round grain) and 750ml (11 pints) boiling water. Bring to a simmer, cover tightly and bake for 30min or until all the liquid has been absorbed and the rice is just tender. Mix in prawns and peas; cover and bake for 5 minutes until heat through. Whether you're planning to travel to a Spanish-speaking country, want to communicate better with a native speaker or just want to broaden your language horizons, it would be great if you could go all-in and learn some Spanish for free. And you can: A program called Duolingo has made it possible to do just that. After downloading this app to your smartphone or logging into the Duolingo website after creating an account, you can start learning Spanish for free in just a few minutes. But what exactly makes this educational tool so effective? Learn more about the program, including how à and why à it works, before you try it out for yourself. Once you create a free account and select the new language you want to learn, Duolingo will start on a "learning tree" which contains several lessons specific categories. Say you decided to learn Spanish. During the firstDuring class, you'll start with easy to learn Spanish words in categories such as days of the week, greetings and colours. Once you learn the lesson, you will start earning "crowns" that unlock more advanced levels. Photo Courtesy: Duolingo/YouTube The Duolingo approach combines images, audio, and printed words to help the mind create multiple connections between images, sounds, and spelling of every word it learns. No matter what your particular learning style is, Duolingo makes it easy for you to start mastering a new language thanks to the ways it involves your different senses. Among its other strengths, Duolingo presents quizzes in a variety of formats. For some quizzes, you will compare every Spanish word with the English word, while in others the program will tell the word and ask you to repeat it in the microphone of your device. This also helps to strengthen your learning in both visual and auditory ways. If you're stuck, it's a built-in language dictionary that you can use to reveal the meaning of every word in a sentence. Depending on your final goals, Duolingo can really work. If you're looking to build a solid foundation for learning a language or want to improve your basic vocabulary, this app is a great tool. Duolingo makes it easy to learn Spanish and other words. However, it won't make you fluent in a language.The app just doesn't offer enough opportunities to learn deeper syntax or practice realistic conversations. In a study at Michigan State University, participants spent a university semester studying Turkish, and then took the regular exam for class 101 Turkish in person. While all participants learned more vocabulary words from the app than they knew at the beginning, "nobody was able to use the language in a very communicative way". Photo Courtesy: Duolingo/YouTube One of the great things about Duolingo, though, is its interactivity. Learn new words as your abilities grow, but you'll see new words transformed into phrases with words learned in previous lessons to help you move on to increasingly difficult words and concepts. If you're looking for a more engaging experience to hear more examples of language in action, Duolingo also offers stories and podcasts in several languages. Unlike just learning a new language from a book, you can hear native speakers using the words you are learning, but in conversation or otherwise. It's also worth taking a look at Duolingo's YouTube channel, where you'll find things like Duo Songs featuring native speakers singing songs in their own languages. Do you want to learn another language besides Spanish? Check out users' feedback on courses that have the structure you prefer. Spanish, French and English have the advantage podcasts, while Spanish, Italian, Portuguese, French and German offer stories. Photo courtesy of Duolingo/YouTube Duolingo ha ha ha Its programs are high in time, so some of the courses are further developed and more complete than others. Your success with the courses (and what you might decide to choose) also depends on what your native language is, as many of the previous courses have been designed for native English or Spanish speakers. That said, Duolingo is constantly working to keep its prices growing. Visit its incubator page to find out if there is currently a course in development you can help contribute and see what's coming soon. Everything from English for Romanian speakers to Navajo for English speakers is in the works, and if you don't see more courses to take right now, chances are you'll find the languages you're looking for looking for Duolingo in the future. Before duolingo, language software tended to be on the more expensive side. While programs like Rosetta Stone and Open English are still great ways to learn new languages from the comfort of home, these and other courses that teach you the basics of Spanish may not be the cheapest option for you. While part of his appeal is that he is free to use, Duolingo is not without competitors when it comes to the effectiveness of his teaching, either. You may also like programs like Babbel, Busuu and Fluentu. Photo courtesy: fluentu/youtube in many ways, Babel is similar to Duolingo except that it requires a monthly subscription fee. While using similar techniques to teach users their language of choice, Babel does not include any ads and has a less players format than Duolingo. Busuu is another paid subscription program that is gaining popularity. While Duolingo helps you learn using native language recordings and feedback in the form of audio quizzes, Busuu is designed to make learning more social. As you learn new skills, you'll be able to receive feedback from other users around the world who already speak the language you're learning. FLUENTU takes a different approach to traditional language lessons by giving access to a range of real-world videos, such as the movie Trailers, music videos and news broadcasts, in the language you are trying to learn. While it requires a monthly subscription, it's an interesting concept and could be something to consider, especially after you've learned the basics of your new language or if you're looking for something that feels more immersive.
