Productivity data based on a series of studies commissioned by Autodesk to an outside consultant. The seven toolset studies compared basic AutoCAD to the specialized toolsets within AutoCAD when performing tasks commonly done by experienced AutoCAD users. As with all performance tests, results may vary based on machine, operating system, filters, and even source material. While every effort has been made to make the tests as fair and objective as possible, your results may differ. Product information and specifications are subject to change without notice. Autodesk provides this information "as is," without warranty of any kind, either express or implied. View Original X Products and versions covered AutoCAD Map 3D 2020Download Products and versions covered AutoCAD Map 3D 2020, & Civil 3D 2020 By: Help In-product view AutoCAD Map 3D 2020 toolset contains customer-focused enhancements across the product. Several features are the result of the need to modernize and streamline frequently used features across many customer disciplines. Your user interface is obviously something that you use all the time. Past customer feedback repeatedly indicated that we needed to make significant changes to improve the clarity and crispness of the dark theme. Similar sharpening was also applied to the light theme as well. As you can see, we optimized the background colors with the icon colors to provide the optimum contrast without distracting from the drawing area, where you're usually focused. AutoCAD Map 3D 2020 toolset allows you to access your GIS data on ArcGIS Online or Portal for ArcGIS Enterprise. You can check the related topics in Help for more details. The following issues are now fixed in this release of AutoCAD Map 3D 2020 toolset: Nova Scotia coordinate Reference System (NSCRS): NS.NAD83.2010.UTM.20N NS.NAD83.2010.MTM.5 NS.NAD83.2010.MTM.4 NS.NAD83.1997.MTM.5 NS.NAD83.1997.MTM.4 NS.ATS77.MTM.5 NS.ATS77.MTM.4 Transformation from OSGB1936 to ETRS89 Deutsche Bahn Reference System Large size GSB files Added support for: GDA2020 Grid Transformation Rocky Mountain Tribal Coordinate Reference System (RMTCR) Extended support for the following FDO providers to newer versions: FDO MySQL Provider: MySQL 8.0 FDO ArcGIS Provider: ArcGIS 10.6.1, ArcGIS 10.5 FDO SQL Server Spatial Provider: MS SQL Server 2017 FDO Oracle Provider: Oracle 18c (18.3) Note: Due to a known problem that exists from Oracle 12.2, users must follow the workaround described here to work with the industry models job in Oracle 12.2 or Oracle 18c: Configure the system with " allow insert with UPDATE CHECK" set to True, by executing the following SQL command: ALTER SYSTEM SET " allow insert with update check"=TRUE scope=spfile Then, restart the database. Support Middle Point Grip for polygons with interior rings. A new command MAPNORTHARROWDEFAULTNORTH is introduced in this release. It allows the user to specify whether the North Arrow points to the default north (i.e., the angle of Pi/2) or the north defined in the current coordinate system. When this command sets to 0, the North Arrow will point to the north defined in the coordinate system. When this command sets to 1, the North Arrow will point to the default north. Enhanced the Industry Module Plot. The following customer issues have also been resolved in AutoCAD Map 3D 2020 toolset: Some of the WFS data got flipped in AutoCAD Map 3D toolset. To solve this problem, in the Data Connect dialog, a new checkbox 'Invert Axis' is provided to allow you to specify whether to invert the axis when handling the WFS. For some WFS service, query the data by 'Locate on map' option didn't work. The command MAPTOACAD took a long time for some specific data. After exported to DWG, the circle symbols got stretched or compressed depending on zoom level. The input values like line thickness, the rotation would change when users change the symbol. Relative Orientation for Utility Point label did not work well for SQLite based industry models. AutoCAD Map 3D 2020 toolset added some Autodesk.Map.IM namespaces to the Form Controls: Formula Box and Script-Programmable-Control. Import from Excel lacked a detailed error message. Intersection Area/Point did not remove deleted/moved feature if using "intersect over the area." AutoCAD Map 3D toolset could not save projection code to the drawing.
